## SUMMARY

I am a graduate of Informatics Engineering Gunadarma University in 2021. I have experience as a Full Stack Web Developer at PT. Teknologi Karya Indonesia. I am currently looking for an opportunity to work as Web Developer, Back-End Web Developer or Software Developer.

## SKILLS

**Programming Languages:** PHP, JavaScript, Golang.
**Framework and Tools:** CodeIgniter, Laravel, jQuery, Bootstrap, NodeJS, ExpressJS, Git.
**Database Management System:** MySQL, PostgreSQL.

## EXPERIENCE

**PT. Teknologi Karya Indonesia – Jakarta, Indonesia**
*Full Stack Web Developer*                                                          *Oct 2020 – Present*
- Developed web-based transport management system using CodeIgniter, PostgreSQL and Adempiere.
- Refactoring old application code into clean and readable code.

**Lembaga Pengembangan Komputerisasi – Depok, Indonesia**
*Lab Assistant*                                                                    *Sep 2018 – Present*
- Responsible for maintaining, supervising and developing infrastructure facilities.
- Created configuration documentation for infrastructure facilities.
- Setting up a course website (Moodle) including student course accounts, learning materials, and course categories.
- Scheduling the use of virtual machines during course activities using Apache Guacamole.
- Teaching in several course materials such as Fundamental Web, Golang for Beginner, and Golang for Intermediate.

**Badan Standardisasi Nasional (Freelance) – Jakarta, Indonesia**
*Full Stack Web Developer – Project Name: SNI Bina UMK*                       *Sep 2020 – Oct 2021*
- Responsible for creating and developing account verification feature, evaluation product feature, product detail pages, training detail pages and news detail pages for SIBUK (SNI Bina UMK) web application using Codeigniter 3.

## EDUCATION
